PROFILE

Technology learner and developer with hands-on experience across web development, backend development, mobile development, product design, data and machine learning, IoT, and quality assurance. I enjoy solving problems, collaborating with others, learning through experimentation, and building practical digital experiences. Currently developing my skills through personal, technical, and collaborative projects at AkiraChix.

TECHNICAL SKILLS

Web Development: React, JavaScript, HTML, CSS, Next.js
Backend Development: Python, FastAPI, PostgreSQL, SQLAlchemy, API Development
Mobile Development: Flutter, Dart
Product Design: UI Design, User Flows, Wireframing, Prototyping
Data & Machine Learning: Python, Pandas, Data Analysis, Data Visualization, Machine Learning
IoT: Embedded Systems, Sensors, Microcontrollers
Quality Assurance: Functional Testing, Test Case Design, Defect Identification, Cypress

SELECTED PROJECTS

Campus Budget Tracker - *Personal Project · React · JavaScript*

- Built a budgeting platform that helps students track income and expenses, monitor budgets, review financial history, and understand spending patterns.

Live Demo: https://campusbudgettracker.netlify.app/
GitHub: https://github.com/GloryMungathia/campus-budget-tracker

Shere — Celebration Moments - *Personal Project · Next.js · React*

- Built a web platform for sharing and preserving celebration moments through an interactive digital experience.

Live Demo:https://shere-celebretion-moments.netlify.app
GitHub: https://github.com/GloryMungathia/shere-celebration-moments

My Fan Page - ***Personal Project · Next.js · React***

- Developed a responsive web experience focused on structured content, visual presentation, and interactive user interfaces.

Live Demo: https://my-fan-page-sand.vercel.app/
GitHub: https://github.com/GloryMungathia/my-fan-page

Pamodzi - ***Group Project***

- Collaborated with a team to build a digital platform connecting commercial buyers with agricultural cooperatives, supporting produce sourcing and coordination.

Website: https://pamodzi-five.vercel.app/
Dashboard: https://phoenixdashboard.vercel.app/

EDUCATION

AkiraChix
Software Engineering Programme
February 2026 – Present

AREAS OF INTEREST

- Quality Assurance — functional testing, test case design, defect identification, exploratory testing, and test automation with Cypress.
- Product Management — product requirements, feature prioritization, user stories, product documentation, and developing PRDs.
